MULTIPLIER EVENT

Unlock Big Data Storytelling Skills in European University Students

2021-1-SE01-KA220-HED-000032034
December 2, 2023
Druskininkai, Lithuania

Multiplier event "Unlock Big Data Storytelling Skills in European University Students" in Lithuania

The project "Unlock Big Data Storytelling Skills in European University Students" aims to bridge this lack of competencies related to Big Data Communication in European universities' curricula. Project partners have developed innovative learning experiences and materials to foster close-to-work skills in university students and teachers. The innovative learning experiences and materials were co-created between partnership members from different countries (Sweden, Italy, Belgium, Lithuania), disciplines (Data Science and Information Design), and economic sectors (universities and start-up companies). The project's core idea is to use Visual Storytelling to make Big Data communication more effective and engaging.

The multiplier event is organized by Vytautas Magnus University, in two sessions - presentation of the results and discussion - and will be held in hotel "Galia", Druskininkai, Lithuania on 02 December 2023.
